2 Main interface

At the top of the main interface is a resident option bar, where you can jump to and refresh the main interface by clicking on the Home button. The "Design New Questionnaire" button will help you jump to the page of questionnaire designing, and the Sign-out button will log out and bounce back to the login interface.

The main interface theme shows a list of questionnaires that the user has designed and published, the list will show the title of the questionnaire, the number of people filled in, the creation time and other information. If you click delete to delete the questionnaire, others can no longer fill out. Click to view the content of the questionnaire and statistical results.

3 Design questionnaire

3.1 Design interface

Click on the "Design New Questionnaire" to jump to the design interface. In the design interface, users can add questionnaire titles and introductions to each of the two input boxes, click "Add Questions" to add questions to the questionnaire, and click "Save" to jump to the page where you saved and generate a share link.

3. 2 Add title

Clicking "Add Questions" to generate an editing area that represents the title you are currently editing, with the number of the title in the upper left corner representing the order of the topics. On the first input box's left is the text content of the topic, and you can choose the type of topic next to the list. If you want to add a single question or multiple-choice question, you can click on the "plus" sign below to add options, in the corresponding input box can enter the option content. If the answer are subject of input text or numbers, you don't have to set other options. If it is a scoring question, you need to set the maximum rating level. Click the trash button next to it to delete the title.

Clicking "Save" to generate a sharing link through which other users can fill out a questionnaire.

保存完成

问卷保存完成, 分享链接: <http://127.0.0.1:8000/papers/25>

5 Fill out the questionnaire

Users fill out the questionnaire by visiting the sharing link, and the questionnaire interface can be seen if the user meets the criteria for filling out. Users fill in different answers based on different question types, and then click “Submit” to submit the results.

The screenshot shows a questionnaire interface with a top navigation bar containing '主页' (Home) and '设计新问卷' (Design New Questionnaire), and a '注销' (Logout) button on the right. The main content area is titled 'test' and contains a text input field with the value 'test'. Below this are three question types: 1. 单选 (Single Choice) with radio buttons for options 1, 2, and 3; 2. 多选 (Multiple Choice) with checkboxes for options 1, 2, and 3; and 3. 文本单行 (Text Single Line) with a text input field containing the value '测试'. At the bottom, there is a footer bar with '主页' (Home) and '设计新问卷' (Design New Questionnaire) on the left, and '注销' (Logout) on the right. Below the footer bar, a message reads: '提交完成，感谢您的参与，请关闭窗口。' (Submission completed, thank you for your participation, please close the window.)

6 View the results

Clicking on the main screen to view the questionnaire, which will jump to the interface where the results of the questionnaire are displayed. The basic information of the questionnaire will be displayed at the top, and the results of the selection questions (single, multiple-select) will be displayed in the middle, showing the number of times the options were selected and the percentage. The results of the numeric input questions are displayed below, showing the maximum, minimum, average, and total values. At the bottom, each fill-in record will be displayed. Click "View" to display the specific fill-in information for the record, and you can view the contents of the text input questions.
